

**Columbus City Schools  
Africentric Early College PreK-12  
Columbus, Ohio  
Completed: 11/2016  
Project cost: \$42,054,111**

**Scope of Services**

Dynamix provided mechanical, electrical, plumbing, and technology engineering design services for this replacement building for the existing Africentric K-12. The new building is designed for 1,000 students in Pre K – 6th grades. The building is two stories and encompasses 139,449 SF. The building includes:

- 3 Pre-Kindergarten classrooms
- 3 Kindergarten classrooms
- 15 Elementary classrooms
- 8 Middle school classrooms
- 6 High school classrooms
- 3 Special education classrooms
- 4 Science labs
- 1 Project lab
- 1 Modular technology lab
- 1 Computer and business lab
- 2 Art rooms
- 2 Music rooms
- Distributed media center
- Cafeteria
- Gymnasium
- Auditorium

In addition the building is equipped with:

- Classrooms with state of the art A/V and technology systems including an interactive projector and Wi-Fi
- Media Center
- Separate gymnasium and dining room
- Air conditioning throughout the building
- Operable windows for fresh air
- Full security system including cameras, exterior lighting, and access control with secure entries
- Fire Sprinkler system and automatic fire alarm system
- Complete ADA accessibility including an elevator
- Environmentally sustainable and energy efficient design
- Separated playgrounds appropriately sized by age group.

The campus also includes a standalone athletics complex, including a 25,500 SF gymnasium building.

**Dynamix Engineering's Role the Project:**

- Full-Service Engineering Including Mechanical, Electrical, Plumbing and Technology Engineering
- Construction Administration
