

**Dayton Department of Veterans Affairs
\$7 Million Building 410 Renovation
Dayton, Ohio
Completion Date: 2013**

Dynamix worked with the Medical Center to renovate building 410 in order provide a more residential-like atmosphere by eliminating congregate bathrooms and 3+ OCC patient rooms. The scope of this project also replaced the current HVAC with a centralized HVAC system for improved air flow and conditions. Dynamix worked with Medical Center to develop the design for the new systems including the controls design, ductwork and security. Mechanical, electrical and technology engineering designs were provided for this project As the lead consultant, Dynamix designed the mechanical, electrical, plumbing and technology systems and hired the architects, structural and civil engineers.

Dynamix Engineering’s Role on the Project:

- Full-Service Engineering Including Mechanical, Electrical, Plumbing and Technology Engineering
- Construction Administration
