

**City of Columbus  
New Impound Lot and Office Building**

**LEED Gold Certified**

**Columbus, Ohio**

**Completion Date: 2010**

**Project Cost: \$4 Million**

The City of Columbus desired a new impound lot and supporting administrative office building to handle the growing needs of the City. Dynamix Engineering was instrumental in designing the 17,000 SF administrative office building which houses the Parking Violations Bureau and the Police Accident Investigation Unit. In addition, the firm designed the 8,000 SF Police Accident Investigation Unit Garage.

The project features light pollution reduction to minimize light trespass from the site. Additionally, energy was optimized at a 25% reduction in energy costs and 40% water reduction.

The project received LEED Gold certification. The project cost is \$4,000,000.

**Dynamix Engineering's Role on the Project:**

- Full-Service Engineering Including Mechanical, Electrical, Plumbing and Technology Engineering
- Construction Administration
