

Concourse B Improvements
Columbus Regional Airport Authority
Columbus, Ohio
Completion Date: 2014
Project Cost: \$40 Million

Dynamix Engineering provided MEP design services to upgrade the HVAC, plumbing and electrical for the B Concourse upgrades. The design included new LED lighting, updated devices and power requirements for vending, plumbing for renovated and new restrooms, improved HVAC systems and updated air devices. Design services were closely coordinated with the architectural modifications and other projects happening concurrently.

Dynamix Engineering's Role on the Project:

- Mechanical, electrical, technology, and plumbing engineering
